

Handibac is an effective fast-acting alcohol based hand sanitiser. It is propanol based making it suitable for both hygienic and surgical hand sanitising when access to hand-washing facilities is restricted.

Handibac provides a convenient way of practicing good hygiene. It's fast drying and leaves no residue behind.

Our formulation is purposely designed for hand-use and contains built in emollients for added skin protection, so no harsh effects to the skin should be experienced.

The antimicrobial agents are capable of cleaning, deodorising and killing a wide range of both gram positive and gram negative bacteria and some viruses all within 5 minutes of exposure. The micro-organisms that are found on the skin are destroyed thus preventing infection and cross-contamination.

Ideal for use in hospitals, nursing homes, kitchens, animal-care situations, vets, public houses, restaurants etc.

Dermatologically tested.

Use biocides safely. Always read the label and product information before use.

Key Features:

- Effective bacteria eliminator
- Effective microbial efficacy
- Disinfects skin before and after surgery
- Suitable for both hygienic and surgical hand sanitising.
- Prevents cross-contamination
- Rapid drying with no residue
- Dermatologically tested
- No irritation or harsh skin effects
- Moisturising properties to keep hands supple
- Biodegradable

Application:

Handibac is ready-to-use – do not dilute.

For use in all areas where hygiene and cleanliness are of utmost importance.

A small amount is sufficient for use as a general antibacterial hand sanitiser. Apply Handibac to the hands and rub well to sanitise and disinfect, making sure particular attention to the nail areas is carried out. Allow to air dry.
